About Teadus Pharma

Advancing Animal Health Through Science, Quality & Innovation

At Teadus Pharma, we are committed to advancing animal healthcare through the development and supply of high-quality Veterinary Active Pharmaceutical Ingredients (APIs). Driven by scientific expertise, innovation and a customer-centric approach, we strive to deliver reliable, effective and cost-competitive solutions to the global animal health industry.

Our manufacturing network comprises strategically aligned manufacturing partners, enabling us to combine robust manufacturing capabilities with stringent quality systems and operational excellence. Through our collaborative manufacturing infrastructure, we focus on delivering consistent product quality, dependable supply and competitive commercial solutions to meet the evolving requirements of our global customers.

Backed by a dedicated Research & Development team and strong technical expertise, we provide responsive technical support, process optimization and timely resolution of customer requirements. Our integrated capabilities span research, process development, analytical support, scale-up and commercial manufacturing.

At Teadus Pharma, we believe that quality, innovation and trust are the foundations of lasting partnerships. We continuously strive to strengthen our capabilities and create sustainable value for our customers through scientific excellence, operational efficiency and a commitment to delivering beyond expectations.

Product Name	Therapeutic Category	ODMF	EU ASMF	CEP	US VMF
Afoxolaner	Anti - Ticks & Anti - Fleas	✔			2027
Buparvaquone	Antiprotozoal	✔			2027
Butaphosphan	Phosphorous Supplement	✔			Planned
Butorphanol					2027
Carprofen	NSAID	✔			2027
Clorsulon	Anthelmintic	✔	✔		Filed
Enrofloxacin		✔			
Flunixin Meglumine	NSAID	✔			2027
Fluralaner	Anti - Ticks & Anti - Fleas				2027
Grapiprant					2027
Lotilaner	Anti - Ticks & Anti - Fleas	✔			2027
Maropitant	Anti-Emetic	✔	✔		Filed
Oclacitinib	Anti-Dermatitis / Anti-Itching	✔			2027
Pergolide		✔	✔		Filed
Pimobendan		✔	✔		Filed
Sarolaner	Anti - Ticks & Anti - Fleas	✔			
Triclabendazole	Anthelmintic	✔			
Trilostane		✔	✔		Filed

Our Manufacturing Capabilities

- Manufacturing units for the synthesis of KSM’s, RSM’s, intermediates and NCE/API’s
- Capable of manufacturing at any scale (kg to multi-ton) under non-GMP and cGMP.
- Capacities of reactors range from 250 L to 14000 L. Combination of both SS and GLR with cryogenic capabilities.
- Overall plant capacity for non-GMP is around 40 KL and cGMP is 340 KL.
- 3 clean rooms for small to medium volume products.
- Our manufacturing units are USFDA approved, EU approved and cGMP certified.

R&D Center of Excellence

Core Competencies

01 | Heterocyclic Chemistry

02 | Organometallic and Cryogenic reactions

03 | Metal mediated reactions (C-C, C-N and C-S bond formation)

04 | Asymmetric synthesis and chiral resolution

05 | Peptide Chemistry - Linear, Cyclic and Branched Peptides

06 | Sustainable Process development with Greener approach

Quality Management System

Vendor Management

- Approved Suppliers
- Vendor Audits
- Use test
- Specification controls

General

- VQ support
- Handling of customer complaints
- Handling of customer audits
- preparation of APQRs

Execution

- Development Report
- Master batch Record Preparation and issuance by QA
- Process validation protocol and Report

Dispatch

- Samples retained
- Labels Verified by QA
- Dispatch records maintained
